

**South Tuen Mun Government Secondary**  
**S3 CCA Program 2016-2017**

**Aim:**

To promote the theme of “use less, waste less, cherish and share what we have”, the S3 CCA program was designed to facilitate students’ whole-person development.

To provide an opportunity for students to work as a team cooperatively to design and produce an environmental-friendly product to be sold at a trade fair held at school.

**Learning Process:**

As students participated in the CCA program, they set goals for themselves and their team. They learnt practical information about creating and designing a product of their choice.

During the whole process, students gained hands-on experience of making important business decisions, like planning all materials needed, estimating expenses incurred, allocating manpower, assigning tasks and most importantly collaborating with others as a team.

**Learning Outcome:**

Students gained valuable business knowledge, learned communication and selling skills, earned wages for their work, commissions for selling a product, and finally shared the profits after liquidation.

Ultimately, positive messages of waste reduction and being grateful were successfully promoted in the S3 CCA program.

**Performance and Achievement**

**Performance and Achievement of each team**

Class	Team #	Products	Cost \$	R	Sales \$	Achievement
3A	1	Paper Book Marks	--		15
